

To whom it may concern,
I have recently purchased the XM service and I'm pleased to pay for a radio service where I have choices. I use the instant weather & traffic everyday going to and from work. Regular radio doesnt have the accurate updates as fast as I'd like to hear it. at any point I can get instant info with XM. With regular radio I have to wait for long periods of time before a traffic report is made and by then its not accurate. I pay for satellite tv too and i watch the weather channel frequently. I PAY FOR IT. IT HAS LOCAL WEATHER TOO. Why would I be denied the same service from XM radio?
Please leave XM alone. We voluntarilly pay for this. Leave it alone.
